## RECORD OF THE PAST

No Stronger Evidence Can Be Had in Barre.

Look well to their record. What they have done many times in years gone by is the best guarantee of future results. Anyone with a bad back; any reader suffering from urinary troubles, from any kidney ailment, will find in the following evidence proof that relief and cure is near at hand:

Alvin F. Smith, retired, address, 9 West street, says: "I was interviewed by a gentleman in the winter of 1897 about my experience with and opinion of Doan's Kidney Pills, procured at E. A. Brown's drug store. I believe I was born with a weak back, and as I grew older, at least every year I was subject to an attack of backache which compelled me to take to my bed. Doan's Kidney Pills stopped that annual occurrence and they have been the means of stopping other attacks since. When I look back over the 22 years of my life and think what I might have escaped had I known about the value of Doan's Kidney Pills, it makes me wonder that people, when they know of a remedy which acts up to representation, will not avail themselves of a positive means of preventing kidney complaint or any of its consequences. Often I could neither lift any weight nor stoop without suffering and added to this there was a difficulty with the kidney secretions. Doan's Kidney Pills absolutely stopped a very severe attack. I have recommended them to many friends and acquaintances since the remedy came to my notice, and I am a great admirer of the medicine. I have taken a course of the treatment and received undoubted benefit."

For sale by all dealers. Price, 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

## Man is Made of Soap Not Dust.

New York, Dec. 22.—Man is made of soap and not of dust, according to a statement delivered before the Harvard society at the Academy of Medicine in this city by Prof. J. G. Adams. Man is not entirely made of soap, of course, but there are scattered through his body an unknown number of tiny globules called "myelins," which are now believed to be a primitive form of soap. It is the only pure type of soap on earth, and scientists say it may be that man was originally constructed on a self-cleansing principle. All he had to do was to exercise his will-power—think—hard—and set his myriads of soap globules in motion.

## A NEW AND DEADLY BULLET.

The Modern Pointed Article Adopted By Our Army.

A new pointed bullet, which it is believed will prove the most efficient rifle projectile in the world as adapted to the requirements of modern warfare, is soon to be adopted by the United States Government for use in the new United States magazine army rifles. Tests have been under way for several months at Springfield, Mass., and the new bullet has shown so many advantages over the present service bullet that Brigadier General William Crozier, chief of ordnance of the United States Army, says that it will undoubtedly replace the one which has been used since 1892.

Instead of the round point of the present bullet, the new bullet has a long tapering point, and is one-third lighter, weighing about 150 grains. It has a greater velocity up to 2,000 yards, a stronger energy up to 1,400 yards, and a better accuracy up to 2,000 yards, than the bullet now in use. In the test for penetration the sharp-pointed bullet demonstrated again a clear superiority over the old service one, which had a record of penetration untouched by any service weapon in the world. The old service bullet has penetrated oak blocks, well seasoned and arranged cross-grained, to a depth of 30.7 inches. The new bullet is capable of a penetration in a block of this kind of over forty-nine inches.

With this new bullet, trees will be of little protection to soldiers, for at close range the bullet would not only pass through the trunk of the tree, but through a couple of men hiding behind it.—Harper's Weekly.
